Sage 300 ERP

Sales Tax by Avalara

Count on Sage 300 ERP Sales Tax
Dealing with sales tax doesn't have to be time-consuming and error-prone. Easily automate sales tax processes with Sage 300 ERP (formerly Sage ERP Accpac) Sales Tax.

Your Challenge
Conducting business in today's myriad of jurisdictions can make sales tax compliance a complex, costly nightmare. You need protection against the consequences of noncompliance, and you don't have the resources a to deploy an expensive, complex software system.
Currently, you are manually researching and maintaining rates—and as the industry changes and laws change, you are becoming more susceptible to audit risk and associated fees. But what happens when your business can't afford to hire expensive sales tax professionals and the risk of manual calculations becomes too high?

Your Solution
Sage makes automation for any business simple with Sage 300 ERP Sales Tax: a hosted, web-service-based solution that automatically performs address validation, sales tax jurisdiction research, and rate calculation—all on the fly within your accounting application, with no change to your existing workflow. Fully detailed reports are always at your fingertips, and returns are automatically prepopulated and generated. It's easy: Sage Sales Tax takes just minutes to download and install. Set up nexus and taxability and begin accessing this professionally maintained tax engine over a secure Internet connection to apply address, jurisdiction, and rate information to every transaction—within the same order-entry or customer setup screen you've always used.

The Bottom Line
With Sage 300 ERP Sales Tax you get the big business protection of sales tax automation without breaking your budget, straining your internal resources, or compromising on functionality. With the peace of mind of sales tax compliance—and the cost benefits of dramatically streamlined order-entry and remittance processes—Sage 300 ERP Sales Tax could be the best technology investment your business makes this year.

Your newfound freedom of choice is supported by a collaborative ecosystem, ensuring success for the life of your business. And of course, with over 30 years of supporting businesses just like yours, Sage technology is proven, reliable, and experienced.

Features

Audit Protection

Get best practices in sales tax compliance and never make a mistake again. Reduce audit risk and ensure that you are charging the correct amounts. Easily consolidate data on multiple companies, export in standard data format, and reduce audit risk. Get coverage for over 14,000 jurisdictions in North America, with consideration to all sourcing rules in every line item. Automatically calculate taxability based on point of origin, point of acceptance, exceptions, exemptions, and more. AutoJurisdiction works to return correct jurisdiction and rate for each transaction. Automatically receive rate research and validation on every line item of every transaction. Collect correct amounts and eliminate the need for manual selecting/assigning. Decrease data entry time and reduce shipping rates with the best source of address data in the country. The AutoAddress+ coding accuracy support system corrects, standardizes, and validates—with a millisecond response time. No update process is required.

Powerful Sales Tax Calculations

A correct sales tax calculation starts with identification of all applicable taxing jurisdictions to a street address. For every calculation, Sales Tax performs address verification and then locates the exact street address within a jurisdiction using a geocoding mapping system. The calculation is made, referring to preset user configurations including nexus, tax jurisdictional issues, exception processing, product taxability rules, sourcing rules, split rates, and maximum tax. All of this happens transparently in the background, automatically updating Sage 300 ERP.

Automated Returns and Reporting

Access all data securely online and get a monthly remittance report in minutes and access line item details, taxable/nontaxable items, reason codes, and location codes. Revenue and cost account reconciliation have never been this easy. Views and drill-downs encompass customer/invoice, product, reason for exemptions, jurisdictional information, and a detailed breakout of rates and taxes by jurisdiction. Automate the entire returns process and collect sales tax information from various internal and external sources. An incorporated returns platform provides sophisticated selection of required forms, prepopulation of tax data for a specified filing period, and intelligent calculations within the form. A revision approval process is included, permitting Sage Sales Tax to maintain records of adjustments. eFiling is also available. Sales Tax puts critical information at your fingertips and simplifies the return process to improve productivity.

Seamless Connection

Experience always-on, real-time access with no maintenance and no upgrade fees. You'll get scalable printing, unlimited user licenses, and a professionally managed repository for addresses and taxes. Never worry about needing to dedicate an IT resource for implementation. Integrate Sales Tax seamlessly with your Sage 300 ERP solution, with no risk to your data integrity or your accounting system. This noninvasive integration is transparent to the end-user, experiencing no changes to the internal process of the ERP. Integration includes: customer file, vendor file, inventory file, line item detail, and more.

Secure Business Integrity

Safe, secure, and controlled! Protect the sensitive information in your business. Sage 300 ERP software assures comprehensive security at variable levels, protecting your important business intelligence from unauthorized access or manipulation.
